

GRYF

Manufacturer of Electronic
Measuring Instruments

MOBILE MEASUREMENT SYSTEM

WWW.GRYF.EU

Development and production of professional electronic equipment since 1990.

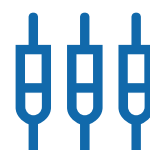

A SIMPLE DEVICE THAT TURNS YOUR MOBILE PHONE INTO A PROFESSIONAL MEASURING INSTRUMENT.

Easy storage of measured records and subsequent sharing via email, instant messaging services like WhatsApp, or the cloud.

Precise date/time and GPS tagging of records when measuring in the field or on a boat. Extensive data export options for further analysis.

Low electrical consumption of GRYF probes allows for several hours of continuous operation from a mobile phone battery.

**COMPLIANT WITH ALL
GRYF PROBES**

**UP TO 8 HOURS
STANDARD MOBILE
PHONE BATTERY**

IP 65

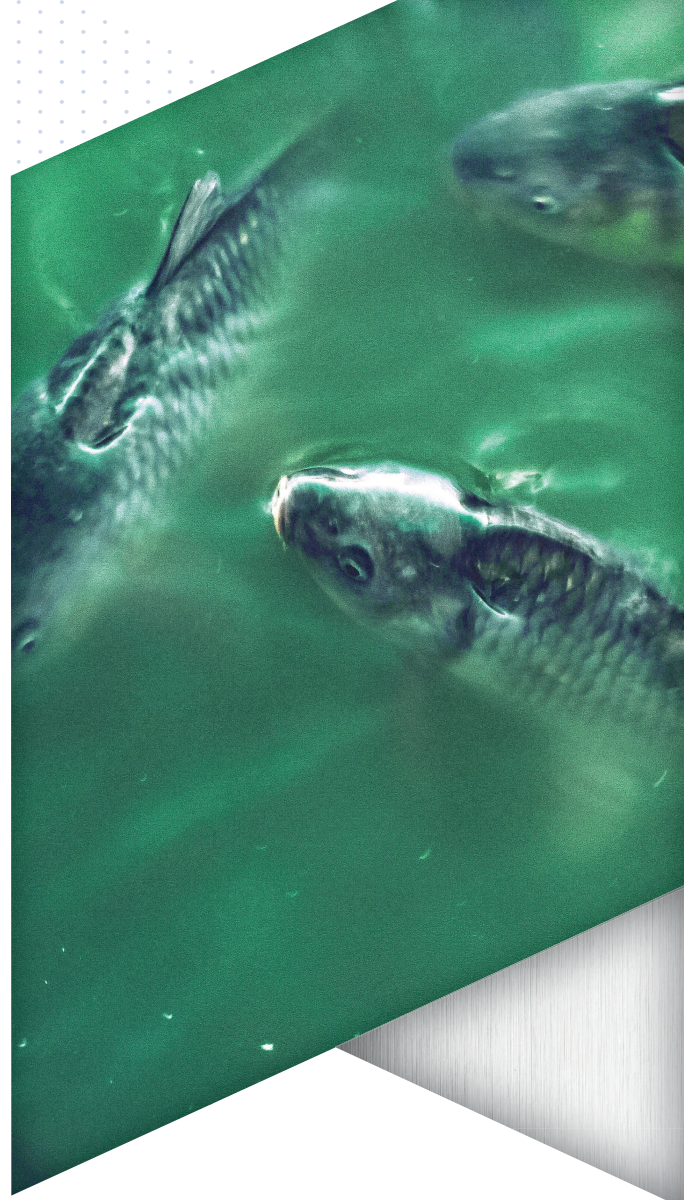

FOR TECHNICIANS

The service of stationary probes has never been easier. After connecting the probe, it is possible to perform its diagnostics or calibration using only the interface and a mobile phone.

Calibration protocols in PDF format can be sent separately or in bulk, after completing the service intervention.

A number of software features, such as a calibration guide or the restoration of factory settings, enable the identification and removal of most issues caused by previous unprofessional interventions.

There is no longer a need to share a single handheld device among multiple technicians and worry about its readiness for use.

GRYF

Manufacturer of Electronic
Measuring Instruments

Connection of external probes	Shielded cable, total cable length up to 100m
Power supply of Intelligent probes	15V / 20mA
Power supply	via USB cable
Communication	4 - 20mA, MODBUS RTU
Operating temperature range	-5 °C ÷ 50 °C
Storage temperature range	-20 °C ÷ 70 °C
Dimensions	95 x 70 x 19 mm

ABOUT US

We are a modern Czech company with over 3 decades of in-house experience and manufacturing professional measuring equipment.
